

UKPEW 2005: Camera Ready Copy Instructions

Nigel Thomas *

Abstract

These are the camera-ready copy instructions used for previous UK Performance Engineering Workshops. These instructions are themselves formatted in the preferred manner for papers intended for the proceedings. Failure to comply with any of these instructions may mean your paper is not included in the workshop proceedings.

1 No-Nonsense Instructions

Because scientists and academics have more important things to do than word processing, these instructions for producing camera-ready copy are intended to be as simple as possible. Anyone who is using LaTeX [1] typesetting system should find them trivial to implement. Users of other systems or packages (such as Microsoft Word) should also find the instructions easy to achieve the desired effect. In summary, we use LaTeX defaults throughout. The title of the paper should be in bold using `\title{\bf ...}` and the author information should be added with the `\author{...}` macro. Addresses should be added to author's names with `\thanks{...}`. Please include email addresses for all authors.

1.1 Sizing, Fonts and Margins

The size for text in papers is 10pt. The desired font is Computer Modern Roman (the LaTeX default). If this is not available on your system then you may use Times instead. The margins are the A4 paper defaults under LaTeX2e. Thus `\documentclass[10pt,a4paper]{article}` gives the correct results. For those not using LaTeX2e, use a left and right margin of 44mm, a top margin of 45mm and a bottom margin of 42mm.

1.2 Page Layout

All pages should be unnumbered, including the first. To achieve this, place the `\pagestyle{empty}` command in the preamble and (to fix a bug which ignores this for the first page) place a `\thispagestyle{empty}` command immediately after the `\maketitle` command. Add the `\flushbottom` command in the preamble to make all of the pages end at the same place.

*School of Computing Science, University of Newcastle, *nigel.thomas@ncl.ac.uk*

1.3 Page Limit

The page count of full papers should not exceed twelve pages including all appendices. Submissions of papers above this length may be returned to the author, if time permits, or omitted from the workshop proceedings. Where accepted as a short paper, these should not exceed six pages in length.

2 Electronic Submission

You can send your paper by email as a PDF (preferred) or postscript file to *nigel.thomas@ncl.ac.uk*. If you are using Microsoft Windows, papers in Word format are also acceptable (but PDF is still preferred).

3 Non-Electronic Submission

If, for whatever reason, you are unable to submit your paper electronically then please send two identical printed copies of your paper printed single sided, unstapled and numbered on the back in light pencil to:
