Programme Chair, World Diabetes Congress, International Diabetes Federation, Montreal, 2009.

Interviewer and webcast anchor, Medscape (2009-)

RESEARCH

Please review the research output in the bibliography that follows.

Current research:

1. Cardiovascular outcomes on rosiglitazone (lead on RECORD study)
2. Cardiovascular outcomes on insulin treated people with Type 2 diabetes (lead on CREDIT study)
3. A study of the optimal use of a basal insulin in Type 2 diabetes (Lancelot - joint study lead – international four-site)
4. External international advisor to Clalit study (Israel, 2007-) and Danish national diabetes study (2009 submitted)
5. International study on insulin analogues outside the western world (lead on A1chieve study)
6. Data safety and monitoring committees for new agents (chair or member)
7. Clinical trials of novel insulins and GLP-1 mimetics
8. Other clinical trials as local principal investigator
