

This document presents the provisional AQA Advanced Supplementary results statistics for Summer 2000. Only the results of U.K. candidates are reported. The statistics are shown as subject tables in which the results for each subject are shown by type of centre and gender. The types of centre reported in the subject tables are: School, F.E. (including Sixth Form and Tertiary colleges) and Other (private candidates and other U.K. centres). In all tables, the statistics refer to candidates who sat the examinations and were graded and not to the number who were entered.

For Advanced Supplementary subjects, results statistics are provided separately for each possible entry option. For example, Art & Design (3191) has three options. Where there are two or more options, as well as reporting the results for each separately, a summary table across all the options is provided.

Further statistical information, or assistance in interpreting the data in this booklet, is available from the AQA Research and Statistics Group at the Guildford Office.
